

Nation-wide PACS system in Estonia

Andrus Aavik, Andrus Paats, MSc

SA Eesti Tervishoiu Pildipank

Agenda

- Foundation of Estonian PACS - Pildipank
- Data handling in Pildipank (PACS, ECG, Pildipank portal)
- Users of Pildipank services
- Pildipank in numbers
- Future of Pildipank

History of Pildipank

- Bitnet project
- Founded on 2006 by Tartu University Hospital (TUC) and North Estonia Medical Centre (NEMC)
- Purpose: to develop and manage the common environment for transmission, archiving and usage of medical images for all Estonian healthcare institutions in equal conditions
- Starting of ECG archiving on 2009

Management and team of Pildipank

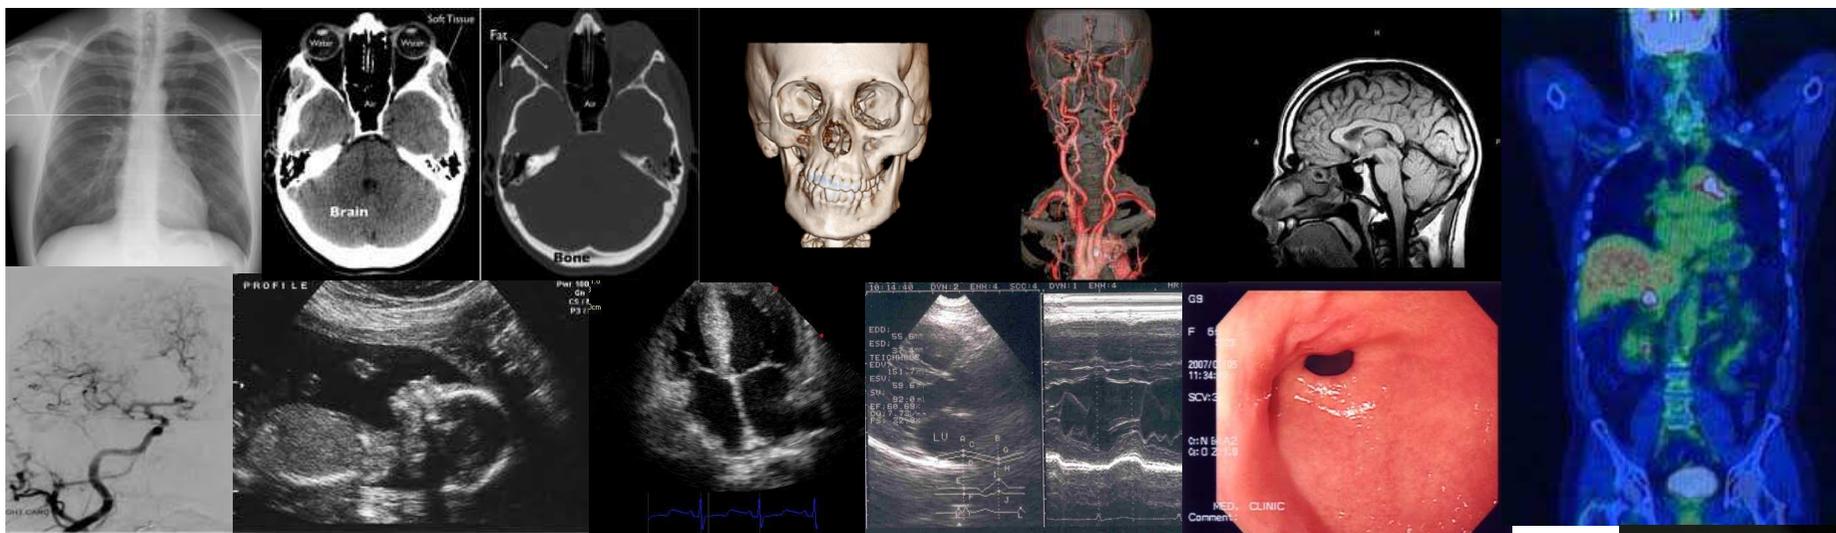

- Council: 3 members
TUC, NEMC and Ministry of Social Affairs
- Executive Board: 2 members
- Specialists
4 Engineers and Sales Manager,
who assures 24/7 operation of Pildipank systems
- Other stuff:
Accountant 0.25, layer 0.25

Pildipank systems.

Receiving of Images

- Pildipank PACS system is capable to receive DICOM images from most of modern imaging modalities (CR,CT,MR,US,ES,NM, etc)

- Old images digitized from old plain film
- Images of patient done by photocamera or operation theatre devices

Connected modalities and other systems

- Modalities

- CR 118 (CR+DR+CRDX)
- RF 2+8 (2 FFPD+8 C-Arms)
- DX 10 (ortopantomographs)
- IO 2 (intraoral dental devices)
- MG 7
- XA 18 (9 angiographs+9 C-arms)
- CT 26
- NM 3
- PT 3
- MR 15
- US 59
- ES 49

Totally archives 320 devices, 13 different modalities and
80 image reconstruction workstations

In April 2013 was archiving 400 devices

- Other PACS systems 5 (ITKH, LTKH, IVKH, Medicum, Mammograaf)

Pildipank systems.

Secure Data Networks

- Data communication between modalities and Pildipank is done using encrypted network channels (VPN)
- Encryption is done with:
 - Special hardware devices,
 - Special software solutions
 - Mobile Telecommunication System Operator solutions

VPN cloud

Pildipank systems. Visualisation of Data

- WEB portal for General Practitioners
- WEB portal integration with HIS's
- WEB Viewer
- ECG Workstation (MUSE)
- DICOM Workstation
- PACS client

WEB portal for GP's

- Integrated with
 - GP's IS
 - HIS
- Mini RIS
 - Ordering
 - Reporting
- Visualisation of ECG's and Radiology studies

WEB1000

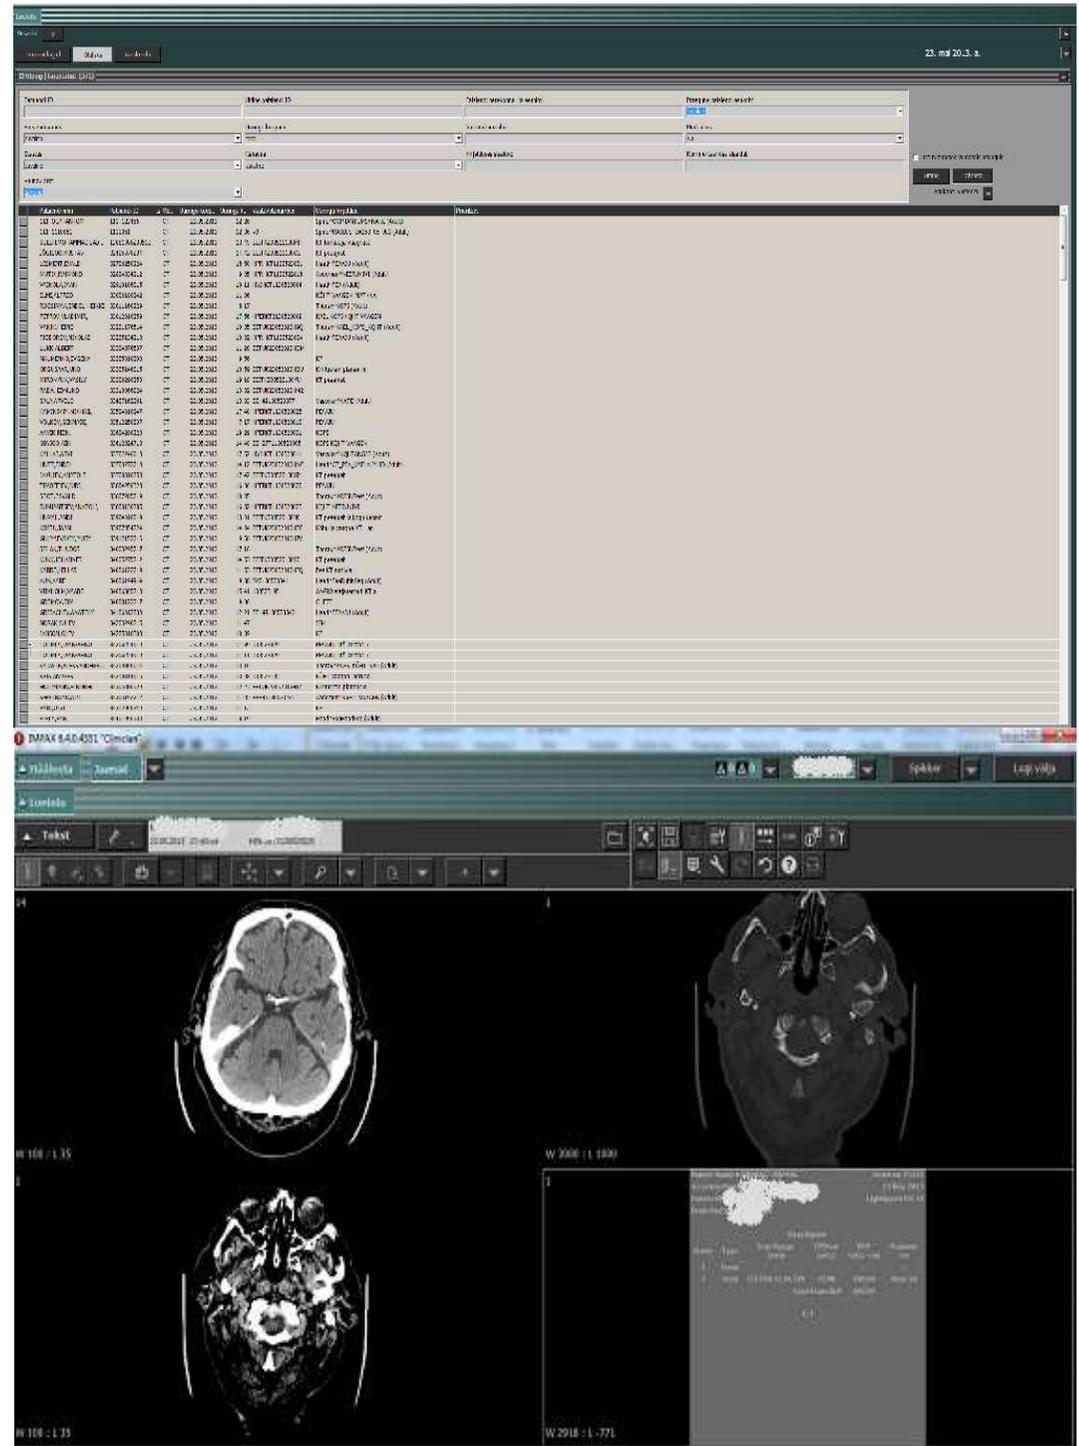

- In country-wide usage since 2001
- Visualisation of DICOM images and simple image processing
- Access to the reports
- Pildipank system with biggest number of users
- Out of date system
- Will be replaced 2013

The screenshot displays the WEB1000 web application interface. The top section features a navigation menu with 'Study', 'Thumbnail', 'Display', 'Report', and 'Conference' options. Below this is a search bar with the text 'WEB1000' and several search criteria dropdowns. A table lists patient data with columns for Patient Name, Patient ID, Accession Number, Study Date, Study Time, Department, Modality, Study Description, Images, Gender, and Image status. The table contains multiple rows of patient records. Below the table, there are buttons for '305 Studies Returned' and 'User ID: apaah, Team: Unrestricted Team'. The bottom section shows a CT scan image viewer with a central image of a chest CT scan, surrounded by navigation controls and technical data.

Impax client

- In use since 2006 in 6 of 42 healthcare institutions (PERH, TÜK, Pärnu, ITK, Kuressaare, Valga)
- 2D and 3D image processing, prostheses planning functionality, teaching file, clinical conference functionality
- Validated diagnostic software

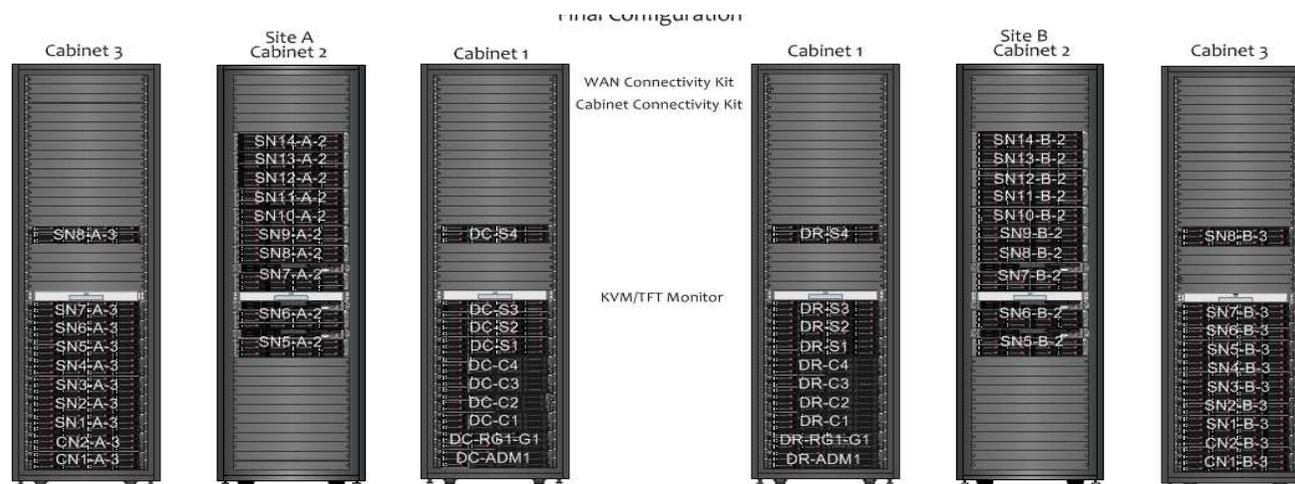

Radiology workflow

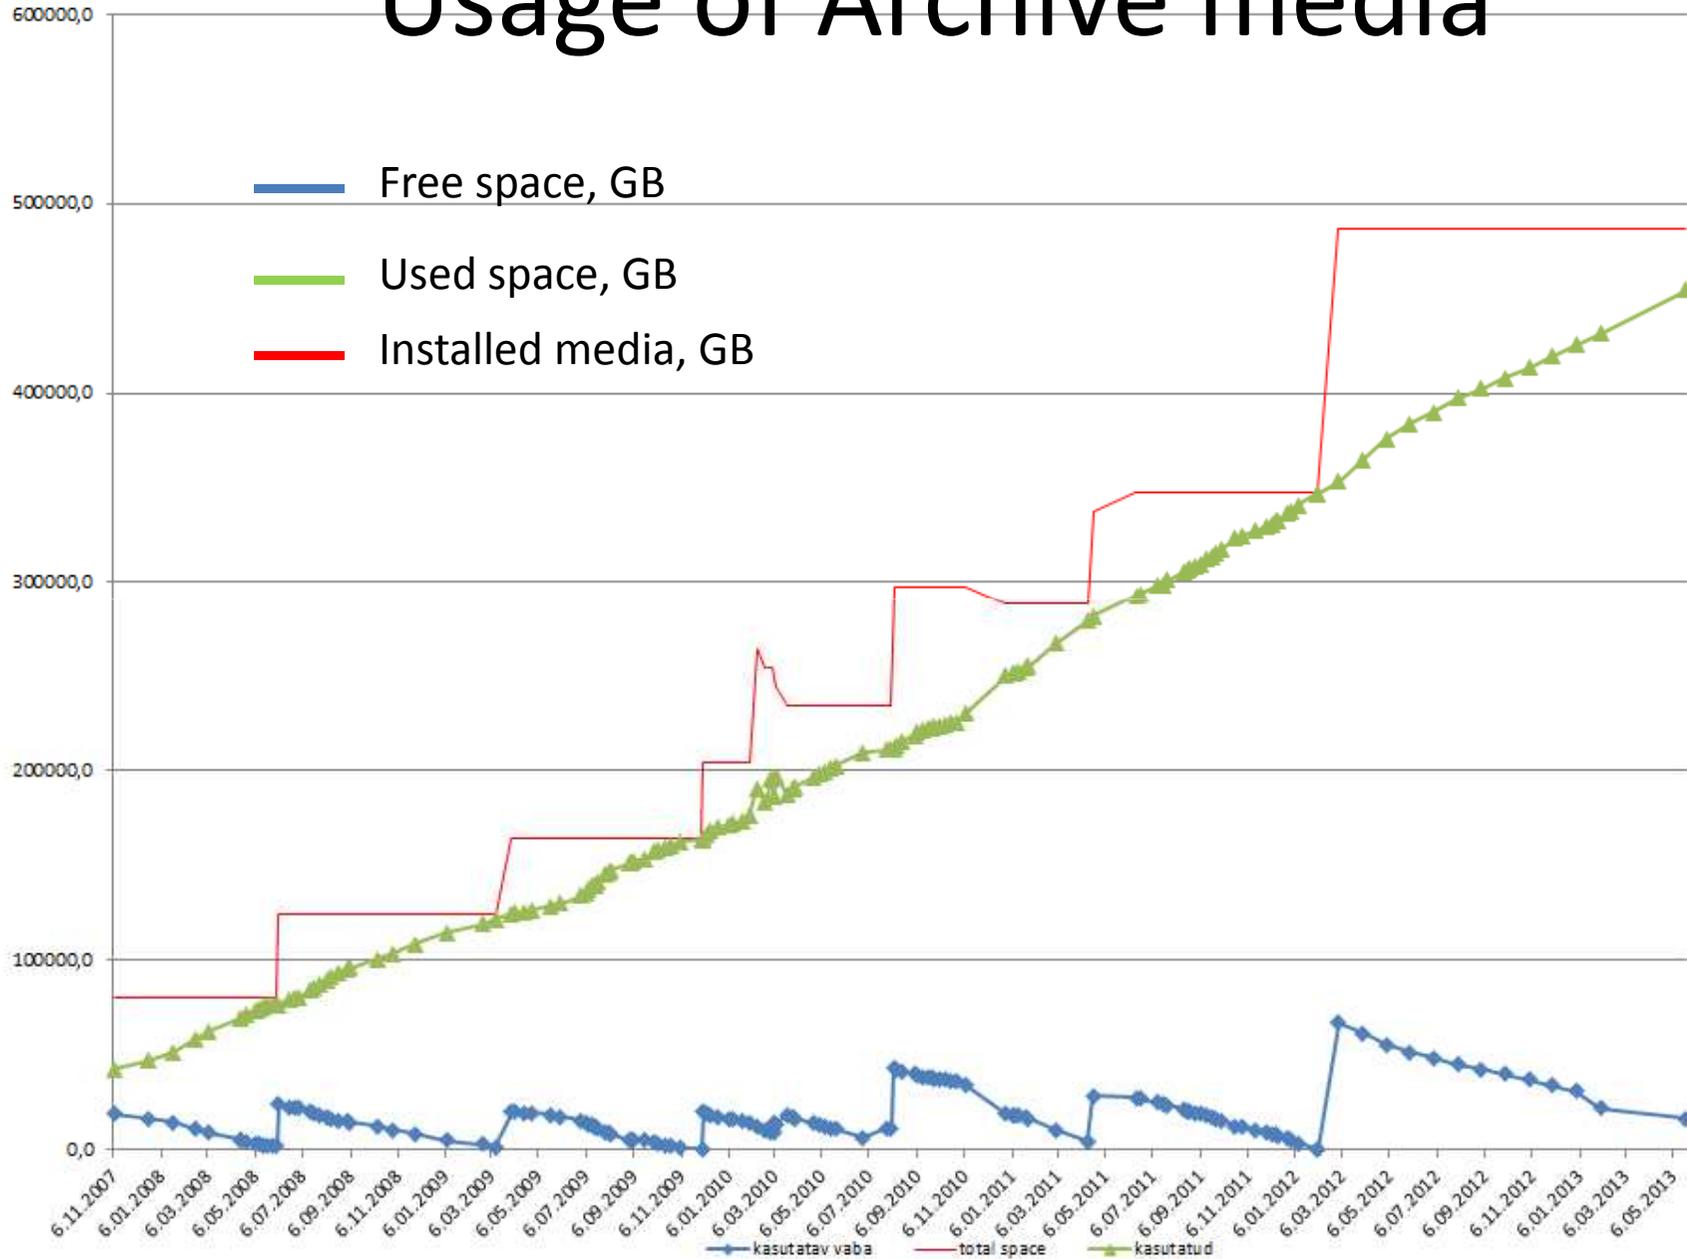

Archive

- HP Medical Archive Solution
 - Disaster Recovery
 - Grid technology
 - Data Integrity (*hash*)
 - Expandable

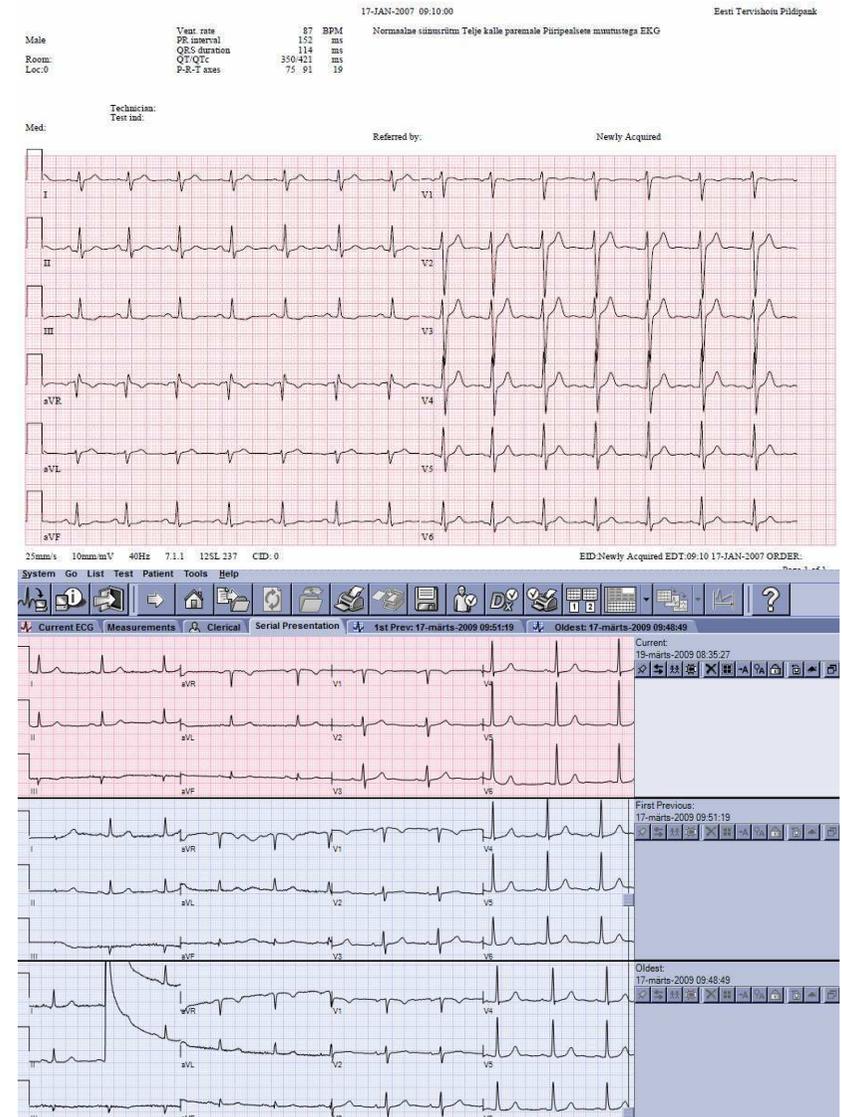

Usage of Archive media

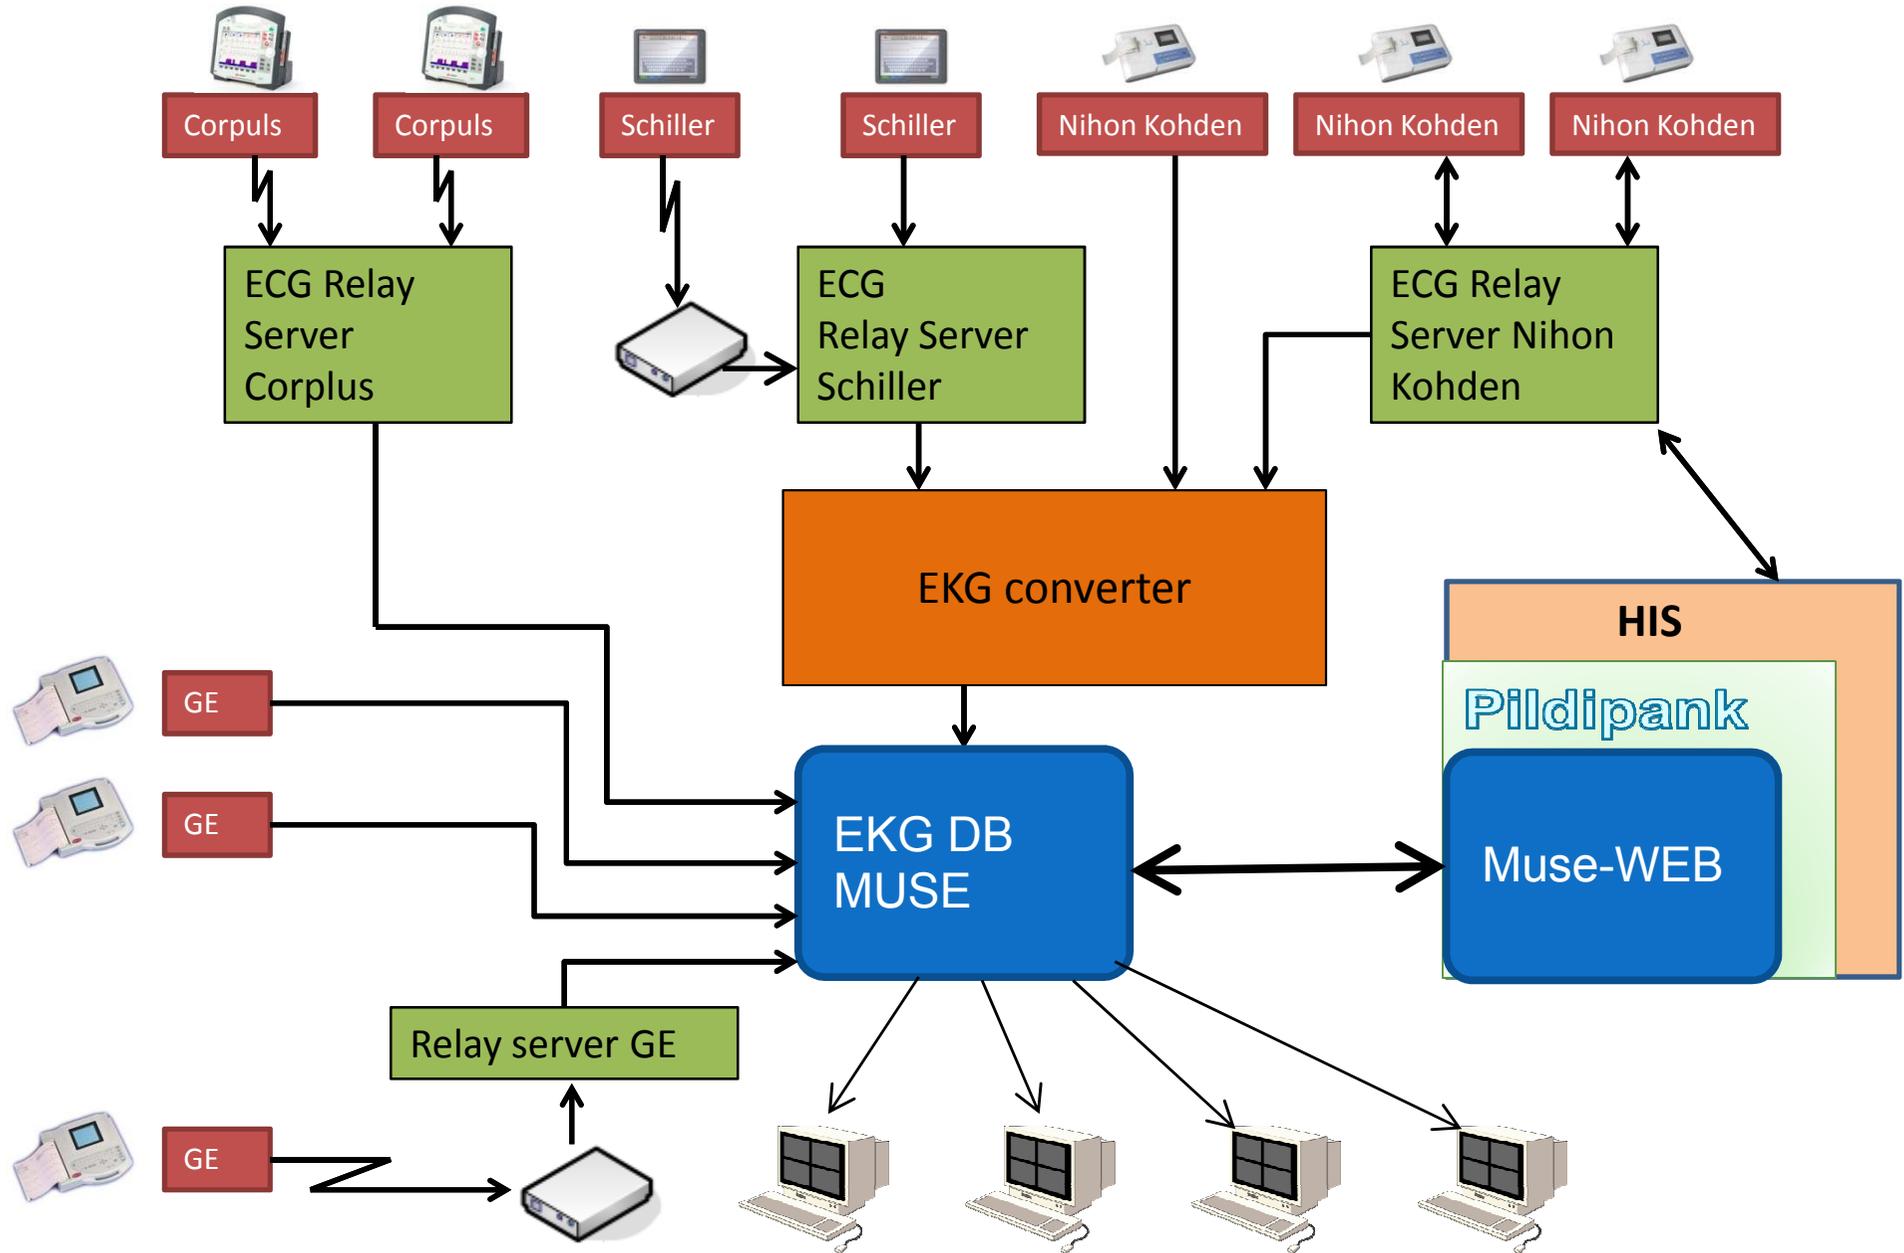

Pildipank systems.

Receiving and visualisation of ECG's

- System is capable to archive
 - Rest ECG
 - Stress ECG
 - Holter ECG
- Users
 - Hospitals
 - GP's
 - Ambulance
 - Paramedics of small remote islands
- Visualisation
 - WEB Viewer
 - GP's portal, integrated HIS's
- Processing
 - MUSE client

Pildipank in numbers

- At the end of 2012 were in Pildipank archive over 6 million studies, with stored data of 480 TB

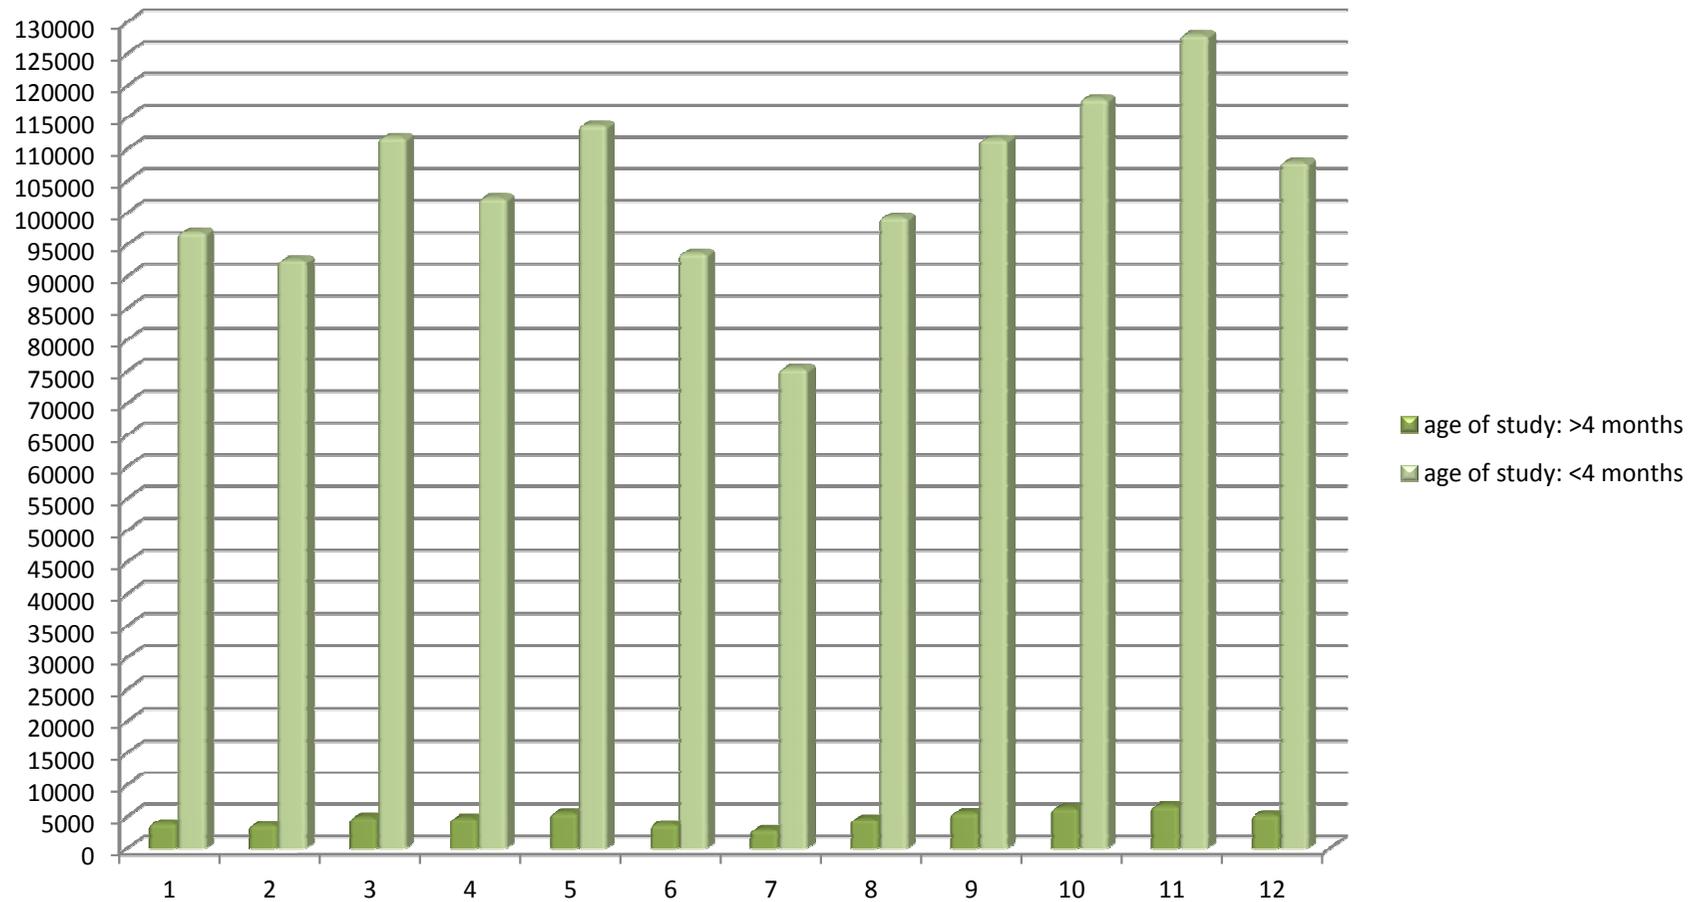

Usage of GP's portal in 2007-2012

Total visualized studies in 2012 year: 1 593 000.

Biggest number of visualisations: 158 000 in November 2012

Viewing of old studies by GP's on 2012?

Pildipank users

- Radiologists
- Clinicians
- GP's
- Residents
- Students of medical faculty
- National Health Insurance Fund
- User accounts:
 - WEB 1000: 3760
 - Pildipank portal: 1330
(713 personal, 536 system)
 - Impaxi client 499
 - DICOM workstations

Investments in Pildipank 2013

- Hardware:
 - New servers: 112 000 EUR+ VAT
 - Short term storage: 108 000 EUR +VAT
 - Extension of long term archive: 212 000 EUR +VAT
- Software
 - Database cluster 10 000 EUR + VAT
 - Extension of input DICOM nodes from 2 to 4:
93 000 EUR + VAT
- New webviewer
 - software 230 000 EUR + VAT
- Service fees 2013:
 - Maintenance of servers, archive, sotware: 104 000 EUR+km

2013 investments + maintenance fees: 869 000 EUR (13, 6 milj EEK) + VAT

Pildipank future

- New webviewer for image visualisation:
 - Compatible with different OS's (Windows, Linux, iOS)
 - Compatible with different webviewer (IE, Mozilla, Chrome, Safari)
 - “ZERO *installation*” Installation of SW and app packages (Java, activeX) is not required,
 - Compatible with mobile devices (iPad, iPhone, Android)
- State archive for medical images
- Stronger influence by Data Protection Agency

iOS 6

Thank you for your attention!
